

**Summer Term Year:** Year 1 Mrs Boyle and Year 1-2 Miss Turner

**Unit of Learning:** How do things move?

**Overview:** This unit will have a focus on Science and Technology. The children will be encouraged to be curious about their learning and to search for answers. They will have a chance to create a wheeled vehicle, and to investigate forces. We will learn about push and pull, friction and air resistance, floating and sinking and how to conduct a “fair test”.

**Languages, Literacy & Communication**

We will look at a mixture of fiction and non-fiction, and will learn about the great scientists of the world. Writing will include fact files, information posters as well as writing a report about predictions made.

**Mathematics & Numeracy**

We will be counting forwards and backwards to 100 in ones, then progressing to steps of 10s, 2s and 5s. We will be looking at measure including length using cm and m.; position - using the language of left and right, quarter and half turns. Year 2 will start to look at traditional times tables and division.

**Ways to help at home**

Read with your child for 10 minutes a day. Help them to read and spell the RWI words, and complete their homework.

**Important Dates**

Please look at the School Newsletter for announcements of future important dates.

Sports Day - 25th June 2025 (am)
